9/22/2021

Joe,

Thanks for reaching out. Is there a time after 10AM you would prefer me to call?

Phil

Hi Phil,

Good to hear from you. Sorry for just getting back to you. I think it would be beneficial if we had a quick call to go over your request and also bring you up to speed on the Parkway VOC issue. I also understand we recently provided several documents to Jeff Meyer including a copy of the 2016 enforcement action (Consent Decree), Parkway's 2017 SEP completion report which contains PM emission calculations, and their recent response to our Section 114 information request letter which summarizes their scrap metal production data for 2018 and 2019. If needed we could resend those documents directly to you but I just think it would be beneficial to have a quick call first. Let me know if tomorrow works for you. I'm available tomorrow except from 2pm -3:30 pm. Thx Joe

Thank you,  
Joseph Cardile, Environmental Engineer

9/21/2021

Hi Joe,

I'm writing to ask for information EPA has regarding Parkway Iron & Metal (NJDEP PI#31125) in Clifton, NJ, based upon the email string below. In specific NJDEP is interested in:

- TSP emissions and calculations
- VOC emissions and calculations
- HAP emissions and calculations, as well as speciated HAPs and how they were identified at this site
- production data exceeding permit and associated dates
- a copy of the enforcement action in 2016 that EPA processed for reference

Please let me know if you have any questions or need to discuss further.

Thank you for your help and assistance in this matter.

Regards,

Philip Savoie

**Subject:** RE: Parkway Iron and Metal

Needed from EPA

- TSP emissions
- VOC calculations , currently permit reflects no VOC emissions.

Hiram – please feel free to reach out to Joe Cardille of EPA. Let's try to make this order as complete as possible.

**Subject:** Parkway Iron and Metal

Please see the attached. EPA is investigating and has referred to us. The source is suspected of high VOC emissions. The permit lists only particulate. Mark last inspected in 2016. EPA has taken enforcement action in 2016 and the source appears to have installed controls without a permit. EPA also has emissions data showing HAPs not listed in the permit as well as production data exceeding permit as well. Please assign to Phil. Do not issue any documents without my approval first.
